About Us

A series of thin, light blue wavy lines that flow from the left side of the page towards the right, creating a sense of movement and modernity.

PT. Intergy Indonesia, as a corporate entity, manages several business portfolios to deliver nuclear and radiation applications for the industrial and medical segments. With a reputation built on customer focus on safety and quality, budget orientation, and operational excellence, we offer radiation safety consultancy, testing and inspection, process diagnostics, dosimetry and environmental, training and certification, and trading and supplies for radioactive and x-ray machine systems.

Our Services

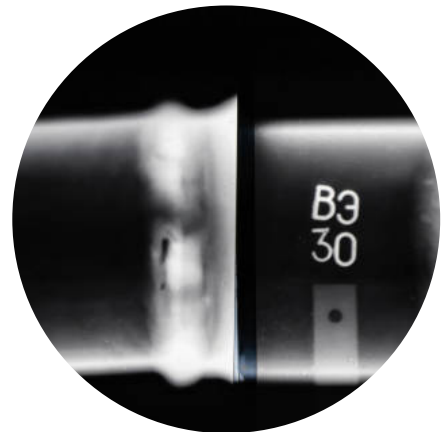

Radiation Safety Consultancy

As the pioneer of the radiation safety business in Indonesia, we provide engineering consulting services. From radiation surveys and monitoring to BAPETEN license handling and facilitation services.

Testing and Inspection

We offer inspection solutions, from radiography and other conventional methods to advanced NDT. Pipeline integrity management and risk-based inspections through rope access and underwater works.

Process Diagnostics

Gamma scanning and Radioactive tracer technology for on-line diagnosis of process malfunctioning, optimization and predictive maintenance.

Our Services

Training & Certification

Complete to our nuclear and radiation training range includes Pelatihan Petugas Proteksi Radiasi (BAPETEN). We also do bridging for our clients all-over-course needs, coming with the typical Intergy service experience.

Dosimetry & Environmental

Our services facilitate TLD and OSL evaluations for radiation workers and the environment, calibrations of radiation survey meters and dosimeters, and NORM/TENORM radiation surveys and monitoring.

Trading & Supplies

Understanding the customer needs about isotope or x-ray for industrial and medical purposes, we provide support for both the principal and the end user as integrated supply chain and operations.

Our Product

Radiation Surveymeter & Dosimeter

Survey meters & Electronic Dosimeter are hand-held ionising radiation measurement instruments used to check such as personnel, equipment and the environment for radioactive contamination and ambient radiation.

TLD

TLDs are used for measuring gamma, x-ray, beta, and neutron radiation exposures. They can be worn by personnel as rings or body badges.

X-Ray & Radioactive Material

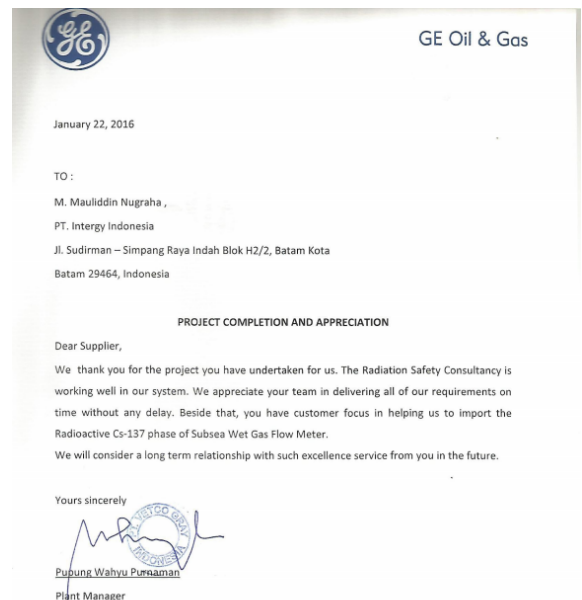

PT Intergy Indonesia is an agent and distributor for several brands of X-ray equipment and radioactive materials for analysis in laboratory needs, radiography, well logging, industrial gauging, and irradiator facilities.

Awarded

in 2020, BAPETEN awarded PT Intergy Indonesia as the best-practice company to handle radiation safety and nuclear security in Indonesia. This is a long-term commitment and core value of the company for long-term business success.

Since 2014, PT Intergy Indonesia has successfully provided consultancy and provided technical support for GE Oil & Gas (now Baker Hughes Company) in regards to the import and export of radioactive substances installed in wet gas flow meters and subsea X-mass tree equipment. This is one of the project accomplishments, along with others from significant industry players such as Pertamina, HLI Green Power, CNOOC, Tsingshan, and others.

Portfolio

A multi years project with more than 180 Km of pipeline inspection services from Cilacap to Yogyakarta, for PT Pertamina (Persero) and PT Nindya Karya (Persero)

PT. Kilang Pertamina Internasional Balikpapan workers received in-house training for industrial radiation protection officers by 2022.

More information about the company's scope of services and experience since 2011 can be found at www.intergy.co.id
